

Amendment to the Claims:

The listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) An electronic calendar system comprising:

a plurality of wireless devices which are operable to belong to a group;

an access point in wireless communication with ~~said the~~ wireless devices;

a server connected to ~~said the~~ access point which provides at least a group calendar which is retrievable by the plurality of wireless devices when operating in the group with the plurality of wireless devices of the group being able to modify of the group calendar; and

~~said the~~ wireless devices being connected to ~~said the~~ server through ~~said the~~ access point in order to ~~obtain~~ retrieve the group calendar data ~~calendar service~~ therefrom, each of ~~said the~~ plurality of wireless devices having equal access to ~~said the~~ group calendar data.

2. (Original) The system according to claim 1, wherein the network is the Internet.

3. (Currently Amended) The method according to claim 2, wherein at least one ~~said~~ of the plurality of wireless devices is connected to ~~said~~ the server through a second access point, a second service provider and the Internet.

4. (Currently Amended) The system according to claim 1, further comprising a global address server connected to ~~said~~ the access point through which ~~said~~ the wireless devices can obtain an address of ~~said~~ the server.

5. (Currently Amended) The system according to claim 4, ~~further comprising~~ wherein the calendar service and server stores data which is retrievable fetched from the server by the plurality of wireless devices.

6. (Currently Amended) The system according to claim 5, ~~further comprising~~ the group calendar service and the data, that is fetched retrievable from the server is ~~available to~~ by any of the plurality of terminals, that is authenticated to be member of the group.

7. (Currently Amended) The system according to claim 5, ~~further comprising~~ where the group calendar service and the data, that is fetched retrievable from the server ~~is available to~~ by any of the plurality of terminals, that is authenticated by the user of the terminal to be member of the group.

8. (Currently Amended) The system according to claim 1, wherein ~~said the~~ group calendar data is displayed on ~~said the plurality of~~ wireless devices having dates listed in linear fashion.

9. (Currently Amended) The system according to claim 8, wherein the group calendar includes entries ~~are of that are displayed by the plurality of wireless devices of the group in different colors.~~

10. (Currently Amended) The system according to claim 8, wherein ~~said the~~ display of the plurality of wireless devices of the group is changed to introduce a new entry into the group calendar data which is typed on a keyboard.

11. (Currently Amended) The system according to claim 1, wherein ~~said the~~ group calendar data is originated partly from another application of the server.

12. (Currently Amended) A wireless family calendar comprising:
a plurality of wireless devices forming a family;
a server containing a calendar data ~~calendar which provides at least the~~
family calendar, said data the family calendar including a plurality of calendar entries;
and wherein

~~a plurality of wireless devices, forming a family;~~

~~said the wireless devices being are wirelessly connected connectable~~
to ~~said the~~ server so as to provide each of ~~said the~~ plurality of wireless devices with
equal access to ~~said retrieve the family~~ calendar data and to allow each of ~~said the~~
plurality of wireless devices the ability to ~~add new data thereto~~ modify the family
calendar.

13. (Currently Amended) The calendar according to claim 12, wherein each
of ~~said the~~ wireless devices has access to an individual calendar data which is not
accessible by any other of ~~said the~~ plurality of wireless devices.

14. (Currently Amended) The calendar according to claim 12, wherein
~~said the~~ server also contains personal data and wherein each of ~~said the~~ plurality of
wireless devices has equal access to ~~said the~~ personal data.

15. (Currently Amended) The calendar according to claim 14, wherein ~~said~~
the personal data can be accessed by ~~said the~~ server in forming the family calendar
~~data or other data for storage in the server~~.

16. (Currently Amended) The calendar according to claim 12, wherein family calendar data is displayed on ~~said the plurality of~~ wireless devices with days within a month being displayed in a linear fashion and with different views being available for weekly and daily calendars.

17. (Currently Amended) A method of accessing a family calendar comprising:

providing a server containing calendar data including the family calendar;

wirelessly connecting a plurality of wireless devices to ~~said the server~~ which provides at least the family calendar which is retrievable by the plurality of wireless devices when the wireless devices are operating in the family and the plurality of wireless devices being able to modify the family calendar;

equally accessing ~~said the family calendar data from said the plurality of wireless devices~~; and

displaying ~~said the family calendar data on said the plurality of wireless devices as a calendar listing on a screen of each of the plurality of wireless devices~~.

18. (Currently Amended) The method according to claim 17, wherein ~~said the plurality of~~ wireless devices are connected to ~~said server~~ the server through an access point.

19. (Currently Amended) The method according to claim 18, wherein ~~said~~
the access point is connected to ~~said the~~ server through a service provider
connected to the Internet.

20. (Currently Amended) The method according to claim 18, wherein ~~said~~
the plurality of wireless devices contain ~~the an~~ address of a global address server
and ~~said the plurality of~~ wireless devices access the global address server to obtain
~~the an~~ address of the server in order to connect thereto.

21. (Currently Amended) A wireless family data center comprising:

a plurality of wireless devices forming a family;

a server containing notice board data and a family calendar
datacalendar which provides at least a family calendar which is retrievable by the
plurality of wireless devices when operating in the family; and wherein

a plurality of wireless devices, forming a family;

said the plurality of wireless devices ~~being are~~ wirelessly connected
connectable to ~~said the~~ server so as to provide each of ~~said the~~ plurality of wireless
devices with equal access to ~~said the~~ board data and family calendar data and to
allow each of ~~said the~~ plurality of wireless devices the ability to ~~add new data thereto~~
modify the family calendar.

22. (Currently Amended) The method according to claim 21, wherein ~~said the~~ server ~~further~~ contains personal data and wherein each of ~~said the~~ plurality of wireless devices has equal access to ~~said the~~ personal data.

23. (Currently Amended) A system according to claim 1 for providing a group calendar service and communication service in a computer network , comprising:

a terminal with an identifier,

a gateway from the terminal to the communication services,

an access point connected to the gateway through which the terminal accesses the communication service, and

a server connected to the gateway, the server having information of ~~the~~ a valid identifiers of the terminals enabling service and a configuration tool in the server for managing at least some of configurable controlling functions of a browser from the terminal.

24.-27. Cancelled without disclaimer or prejudice.
